

# The Next Generation of Revenue Management is Here

Finvi has taken the payment process to the next level

## Are you tired of manually bridging the gap between your core operating system and your payments platform?

With **Finvi Payments**, you no longer have to rely on your employees to serve as that bridge. Because our payments platform is native to our workflow solutions, we can offer one-of-a-kind automation that saves you time, money, and a lot of headaches.

Our all-in-one solutions provide built-in, integrated capabilities, such as automatic credit card and account updater, automated status updates with easy batch reversals, and enhanced reporting for simplified payment reconciliation.

Say goodbye to tedious manual reversals and reconciliation, and say hello to a more efficient, accurate, and stress-free process.

### Account Updater

Maximize revenue recovery with uninterrupted payment plans

With Account Updater, card information is automatically checked and updated with new expiration dates and lost or stolen numbers – no consumer action needed.

Save time and money by keeping current payments flowing and enabling your employees to focus on new accounts.

### Automatic Payment Reversals

Make manual reversals obsolete

Our workflow solution automatically communicates with Finvi Payments to seamlessly:

- Update when a payment is returned due to insufficient funds or chargebacks\*
- Create a reversal on the account in the system
- Allow you to initiate reversals easily via batch file

### Advanced Payments Reconciliation

Minimize your reconciliation headaches

This new enhancement automatically creates flags on individual transactions in the collection system to let you know the payment has cleared. Quickly and easily:

- Confirm the trust account where the money was deposited for electronic payments
- Verify when the money hits the actual bank accounts
- Validate when a specific payment reaches a certain bank account

**Discover what these enhancements can do for your business. Contact us today to get started.**

\* Unsuccessful or denied chargebacks get reposted after the dispute is resolved.
