

Finvi's Payments Solution:

Transforming the Payment Journey

Advance your competitive advantage and empower your clients by fully integrating secure, modern, flexible payment capabilities into your current platform.

For your clients, managing invoices and taking payments might not be the primary focus of their business, but it's a necessary component to keep their company moving forward. However, outdated technology, excessive time requirements, and limited payment options can make getting payments in the door difficult. Round-the-clock efforts to manage payment collections can not only strain resources, but also impede top- and bottom-line growth for your clients.

Did you know. . .

69%

of consumers say they would be more likely to pay bills on time if they could pay by text?*

Advance Your Competitive Advantage

Now imagine if you empower your clients with the ability to not only easily set up payment plans for consumers, but also provide them with Text-to-Pay capabilities making it convenient for their consumers to pay with just a quick SMS message.

Improve Client Satisfaction & Loyalty

By integrating our payments solution into your current platform, you can offer your clients an all-in-one business management solution – one that tracks the first interaction with the consumer through the final payment. Let us help you arm your clients with superior payment capabilities.

- Flexible, Self-Service Payment Options
- Text-to-Pay Convenience
- Hassle-Free Payments
- Data Driven Results

Flexible, Self-Service Payment Options

A secure online payment portal for consumers reduces the number of staff hours it takes to collect a payment and provides easy, familiar payment options that are based on the consumers' existing preferences (ACH, Debit, Credit).

Text-to-Pay Convenience

Modern, user-friendly functionality allows consumers to pay bills with a simple text message. Plus, automatic email/text notifications help your clients meet the demands of a digital world.

Hassle-Free Payments

Simple-to-setup payment plans allow for improved revenue recovery and ease the burden for consumers.

Pay

54%

of consumers say they prefer payment plans for budgeting purposes.**

Data Driven Results

Built-in reporting tools that allow for reconciliation by day or payment type.
